***Election/Restrictions***

Claims in the application are 1-20.

Restriction to one of the following inventions is required under  
35 U.S.C. 121:

- I. Claims 1-8 and 14-19, drawn to methods for producing intervertebral disc tissue and for repairing intervertebral disc damage, classified in class 424, subclass 423.
- II. Claims 9-13, drawn to a cohesive engineered intervertebral disc tissue containing specific amounts of water, DNA, proteoglycan and collagen, classified in class 435, subclass 1.1.
- III. Claim 20, drawn to a kit for producing intervertebral disc tissue containing instructions, growth media, semipermeable membranes, growth factors and lab equipment, classified in class 435, subclass 283.1.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the methods of invention I can produce materially different tissue than required by invention II by producing tissue having a different content of water, DNA, proteoglycan and collagen than required by invention I.

Art Unit: 1651

The methods of inventions I can be carried out and the tissue of invention II can be produced without using a kit as required by invention III. The components of the kit can be used without being formed into a kit prior to use. Additionally, the kit can be used in a method other than required by the methods of invention I to produce tissue other than required by invention II.

Examining inventions I-III together will be a serious search burden due the requirement for three different searches necessitated by the differences in claimed inventions I-III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable,

Art Unit: 1651

withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of In re Ochiai, In re Brouwer and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
